

## EXAM 1 HCI CS 464 Spring 2024 Study Outline

- Chapters 1, 2, 4, 5, and 6 are part of the exam.
- Watch all the lectures before Exam 1 if you haven't already.
- Read your notes, read the slides, and the chapter. Anything covered in class can be part of the exam if it is related to chapters 1, 2, 4, 5, and 6.
- We will not ask for dates or dollar amounts.
- Exam 1 has no open questions. It has multiple choice, true/false, fill in the blank, multiple fill in the blank, match, drop-down, select all that apply, etc.
- The number of questions the exam will have will be announced Tuesday in class and later posted in Teams.
- Chapter 1 until the end of section 1.5 (that's around page 15 in the second edition)
- Chapter 2, up to Section 2.7.4. However, you also need to read part of Section 2.7.5 until page 80 (where the last paragraph of page 79 continues and ends with "... others not so well.")
- Chapter 4 until section 4.8
- Chapter 5 all
- Chapter 6 all
- Questions from quizzes may not come out again, but sometimes they appear (in very low frequency) in the same or different forms. Review your quizzes that have been graded and released until now.
- Homework #1. Homework #1 questions may come up. The concepts of those questions but not the actual homework.
- If needed in a question, figures that may be provided include Figures 1.6, 2.1, 2.3, 2.4, 2.5, 2.6, 2.7, 2.11, 2.12, 2.13, 2.14, 2.15, 2.17, 2.19, 2.41. All figures from Chapters 4, 5, and 6 will be provided if needed. Note the fact that a question related to a description of a figure listed here does not mean the figure will be provided. It will only be provided if the answer is not possible without the figure. However, if the answer is not possible due to knowledge (meaning, the figure is critical to answering the question), it will not be provided. For example, figure 4.13 does not need to ask about internal or external validity.
- If you study a lot and one question does not show, don't worry; it may show in Exam 2 or the final exam.
- Understanding exam questions is part of the exam. No questions during the exam. If you think we made a mistake, this will be addressed later.
- Feel free to ask questions before the exam.
- You are not allowed to talk about the exam, help anyone with the exam, give your exam, or provide questions or possible answers on the exam. After I determined that it is safe to talk about the exam, you can talk about it in class, but your actual exam remains private to you.
